

GreenOps Target Architecture

Carbon-aware code review control plane: event-driven, horizontally scalable, audit-ready

SOURCES

DATA PLATFORM  
state lives outside workers  
so they scale horizontally

NEW

PostgreSQL

repos · jobs · findings · reviews

NEW

Object Storage

sandbox snapshots · reports · SBOMs

NEW

Redis Cache

AST / graph by commit SHA · LLM response cache

Immutable Ledger Store

WORM storage · hash-linked records · backups

NEW

Time-Series & Analytics

SCI trends · org / repo rollups

DESTINATIONS

CROSS-CUTTING PLATFORM SERVICES apply to every layer above

NEW

Identity & tenant RBAC

org / repo scoped access

NEW

Secrets management

Azure Key Vault · token rotation

NEW

Observability

OpenTelemetry logs · metrics · traces

NEW

Runtime & delivery

containers on AKS · Helm · KEDA

NEW

Supply-chain security

signed images · SBOM · scanning

NEW

Self-carbon accounting

GreenOps meters its own scans & LLM use
